Restored Derelict Land (2010)

Restored Land (1993 - 1998)

Restored Land (1993 - 1998)

Overburden Storage Area

Surcharge Mound

Restored Land (1980 - 1990)

Initial Void

Area Available For Progressive Restoration

Progressive Backfilling of Void

Plant Maintenance Area

Coal Stacking Area

Restored Land (1995 - 2000)

Proposed Extension to Current Limit of Excavation

Vegetation clearance / removal of soils

Western Extent Of Currently Permitted Excavation

Overburden Storage Area

Restored Land (1995 - 2000)

Managed Land

Proposed Extension to Current Site Boundary

YEAR 1

INITIAL VOID

- > Minimal clearance of vegetation and soils to allow excavation to move towards the south-west
- > All useable soils to be stored for re-spreading at a later date as part of the restoration
- > Continuity of coal extraction in a south-westerly direction
- > All excavated overburden to be backfilled internally – no material to be stored in tip (above ground)
- > 21 hectares of land available for progressive restoration
- > Excavation (and tipped) slopes not required for operational purposes to be seeded to grass
